Nico Cruickshank, Web Developer

Collaborative web developer with a passion for fostering teamwork and delivering results. With experience and expertise in both custom code and CMS web solutions, I thrive in dynamic environments where I can leverage my strong communication skills to bridge the gap between technical and non-technical stakeholders, ensuring seamless project execution. I have a keen interest in tech and enjoy staying current with industry trends to deliver innovative solutions. My diverse background enables me to adapt quickly and contribute across different areas of tech and digital innovation.

Employment History

Wordpress Developer at Scoot Digital, Glasgow

August 2024 — December 2024

At Scoot Digital, I have honed my skills in developing dynamic, custom WordPress themes that allow clients to manage their own content effortlessly. I have been able to leverage the flexibility of ACF and Timber to create intuitive and adaptable websites that align with client specifications while ensuring optimal performance and usability.

- Developed custom WordPress themes for a variety of clients, allowing for a high degree of customisation while maintaining client control over site content.
- Integrated Advanced Custom Fields (ACF) to create bespoke content management solutions tailored to each client's needs.
- Utilised Timber and Twig templating to enhance the flexibility and organisation of theme structures, ensuring clean, maintainable code.
- Conducted thorough cross-browser and cross-device testing to guarantee compatibility and optimal performance across all platforms.
- Collaborated closely with designers and other developers in a fast-paced environment, delivering high-quality solutions within tight deadlines.

Web Developer at Target Healthcare, Glasgow

October 2023 — June 2024

During my tenure at Target Healthcare Group Limited, I honed my skills in designing and developing high-performance websites and web applications that prioritized user experience and functionality. By leveraging the power and flexibility of WordPress, I created custom solutions that met stakeholders' unique requirements, showcasing my ability to adapt to different project needs.

- Developed and maintained responsive, visually appealing web pages using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and optimal performance to enhance the user experience.
- Maintained server-side applications using programming languages such as PHP with Symfony framework, integrating databases and APIs to support dynamic content and functionality, and delivering robust and scalable web solutions.
- Designed, developed, and maintained WordPress websites, leveraging the platform's extensive ecosystem of plugins and themes to create custom solutions tailored to clients' specific needs and requirements.
- Conducted thorough testing and debugging to identify and resolve bugs, performance issues, and security vulnerabilities.
- Worked alongside project managers to scope out project requirements, ensuring alignment with business goals and technical feasibility.

Web Developer at Arnold Clark, Glasgow

November 2019 — August 2022

During my time at Arnold Clark, I gained valuable insights into the significance of effective communication within a team. By actively engaging in daily stand-up meetings and assisting colleagues with their tasks, I witnessed firsthand how seamless collaboration positively impacted productivity and project outcomes.

- Collaborated with a cross-functional team of developers, including back-end, front-end, UX designers, and product managers to deliver high-quality software solutions.
- Developed and maintained web application back-ends using C# and .NET Core, ensuring optimal functionality and performance.
- Worked with SQL databases, both on-premises and in the cloud, within SQL Server Management Studio, handling data management and performing efficient queries.
- Effectively communicated with stakeholders to understand their requirements and provided regular updates on project progress.

Web Designer and Digital Marketer at Disabled Access Holidays, Glasgow

November 2016 — April 2019

My time as an Apprentice Web Designer and Digital Marketer at Disabled Access Holidays was an invaluable learning experience. It allowed me to cultivate diligence and attention to detail in marketing campaigns, coding, as well as in the maintenance and repair of mobility equipment. Interacting with customers face-to-face and through social media provided me with valuable insights into our target audience, enabling me to tailor marketing strategies and campaigns more effectively to their needs.

Tech Skills

HTML, CSS, JavaScript

PHP w/ Symfony

WordPress w/ ACF & Timber

React w/ Next.js

Hardware Troubleshooting

Education

HND Computing, City of Glasgow College

August 2018 — July 2019

Digital Marketing and Web Design Apprenticeship (HND Equivalent), QA Apprenticeships

November 2016 — October 2018

Hobbies

I'm a big fan of retro technology – I love tinkering with analogue gadgets like record players and CRT TVs as well as old consoles. There's something really satisfying about understanding how these old devices work. I'm also into reading, particularly political, philosophy and horror books, and I'm a big fan of anything by Alasdair Grey. Plus, I've recently started learning 3D modelling with Blender, which I'm thoroughly enjoying.
